NABR NETWORK PARTNERS WITH PAYLEASE

Authorized residents with member accounts in the Nabr Network system can make association payments with a single sign-on (SSO) on the Nabr Network side.

Lewisville, Texas (November 10, 2016) – Jeff Miles, president and CEO of Nabr Network, announced today that Nabr Network has partnered with PayLease to offer another resident serving component to its suite of features. Community management companies using the Nabr Network system can now seamlessly integrate their PayLease accounts with the Nabr Network software. Authorized residents with member accounts in the Nabr Network system can make association payments with a single sign-on (SSO) on the Nabr Network side.

“The residents using Nabr Network appreciate the single sign on and the convenience of making a payment on desktop or mobile.” Miles said.

Nabr Network integrates with many accounting software platforms used in the community management industry. Partnering with PayLease gives Nabr network its first payment system integration.

About PayLease

PayLease provides online payments, resident billing, and utility expense management tools to property management companies. PayLease solutions are easy-to-use and are backed with the highest levels of security and customer support. PayLease serves thousands of property management companies nationwide and is among the fastest-growing technology companies in the United States. Learn more at www.paylease.com.

About Nabr Network

Nabr Network is an industry leading communication software company serving the critical need of community association management companies informing their residents timely and efficiently. Nabr Network’s notification solution connects managers and their residents via mobile app, text, email and traditional web presence using a one-touch communication management system. Nabr Network’s system is easy-to-use and always provides timely technical support to its users. Learn more at www.nabrnetwork.com.
