NABR NETWORK ANNOUNCES NEW INTEGRATION PARTNERSHIP WITH VILLAGE MANAGEMENT SOFTWARE (VMS) PROPERTY MANAGEMENT SOFTWARE

The integration provides a seamless community association management software and communication solution.

Addison, Texas (September 25, 2015) – Jeff Miles, president and CEO of Nabr Network, has announced a new integration partnership with Village Management Software (VMS) Property Management Software.

VMS provides interactive, real-time data management for all aspects of the property management world.

Community management companies using VMS and Nabr Network can now provide their associations access to violation history, work orders and account information via the Nabr Network mobile app or web presence. Community association managers can use their Nabr Network dashboard as a central hub for all of their communications – both for broadcast community alerts and for resident-specific communications.

"This integration is a game-changer for community association management companies," Miles said. "Without question, communication is the top challenge for community management professionals. Nabr Network addresses this challenge head-on. This software integration creates a one-stop management and communication solution."

Nabr Network is the industry's most comprehensive private communication platform and web presence-- specifically developed for community associations. Nabr Network goes beyond traditional websites and email blasts to deliver time-sensitive alerts, reminders and event notifications on the devices that residents prefer to use. Nabr Network's one-touch communication platform provides management companies and associations the ability to push news through mobile app, text, email, Community Feed and automated web updates.

The Nabr Network app is available through the App Store and Google Play.

Village Management Software

Village Management Software (VMS) is one of the most technologically advanced and comprehensive property management tools available to date. VMS is not just a single program, but a suite of management tools including everything from accounting, compliance, collections, and delinquency control, to interactive web modules allowing residents, property managers, board members and vendors to interact and communicate in real time.
